

2024 Surgery Team Supplies and Medications

The following pages will list the surgical supplies and medications that will be available to our surgery teams in 2024.

1. Standard Supply Pallet List
2. Standard Surgery Pack
3. Pedi Surgery Pack
4. Surgical Formulary List (medicines)
5. Narcotics
6. Crash Cart
7. STAT Kit
8. First Aid Kit
9. PPE for Teams (Surgery)
10. Ortho Implant Information
11. Mesh & Medication Protocols

Please review the full workbook with your surgeons and nurses to determine what additional medications and/or supplies your team will need for the specialties you plan to bring. We ask the team leader to work with their volunteers to procure additional supplies and medications needed for the week. A customs form will need to be completed for any medications and/or supplies you plan to bring to Guatemala on your team flight. Please review the Customs Information Guide and Form document for details and guidelines for completing the customs form, due to Faith In Practice 35 days prior to your arrival in Guatemala.

Mesh & Medication Protocols

Expiration Dates

Medications should be within expiration dates for distribution by teams to patients. In the event a medication is expired, the responsible team member (Anesthesia, Pharmacist or other team member) may decide on the safety and efficacy of an expired medication. According to national guidelines there are specific medications that MUST NOT be used after the expiration date. These include:

- Insulin
- Oral nitroglycerin (NTG)
- Vaccines, biologicals, or blood products
- Tetracycline
- Medicines that look old: degraded, powdery, cloudy, or crumbling medicine, drugs with a strong smell, or dried up medicine (as in the case of ointments or creams) should be discarded.
- Refrigerated liquids
- Eye drops with preservatives
- Injectable pens
- Specially compounded medications

The Supply Chain Management team will rotate medications in a first in first out fashion to avoid waste and assure quality of care for patients. Medications nearing expiration should be in the system so they can be used in a timely manner and can be stored in accordance with best practice and manufacturer directions.

Mesh Policy

Mesh is a high value item that can be quite useful in many of the general surgeries that are performed within the FIP surgical programs. For patient safety and quality of care, the following guidelines need to be taken into consideration when sourcing supplies and planning teams:

Mesh that may not be used in Faith In Practice Programs in Guatemala

The following types of mesh within the following brands may not be used in Guatemala in any program.

BARD

Composix EX and LP
Sepramesh
Ventrelex Hernia Patch, Ventrelex ST Patch
Ventralight ST
Ventricio, Ventricio ST

ETHICON

Physiomesch

ATRIUM

C-Qur Mesh

Mesh already in Guatemala that is approved for use but is nearing or past expiration date

Mesh that has already been imported to Guatemala may be used at Obras Sociales Hospital for Faith In Practice programs with a re-sterilization process. This process is not available for HHG. It is the responsibility of in country staff to manage this process and to assure proper cycling through of mesh first in first out to source teams with supplies in country. It is also the responsibility of in country staff to manage the proper discarding of mesh when it can no longer be used due to partner hospital restrictions and best practice in country for the safety of patients and to provide for the clear sourcing of the needed mesh for future seasons, through supply chain procurement or clear and timely requests from teams via the Supply Chain manager and the Volunteer Program staff.
